

Effectively Moves Trash In All Conditions!

- ✓ Mounts on John Deere, Khun, Monosem, Horsch and Vaderstad planters.
- ✓ Will continue to operate in wet conditions. Tills soil surface to reduce crusting.
- ✓ Can be used in front of Sunco's Nutri Mate II or alone on most planters.
- ✓ Sabre Tooth design gives positive rotation to reduce plugging in heavy trash conditions.
- ✓ Can be easily adjusted to move trash only or both trash and soil without plugging.
- ✓ Works well in ecofallow, no till or minimum till applications.

How To Move Trash Without Plugging When Planting

A New Solution For An Old Problem

Sunco's Trash Discs Solve the Problems of Farming in Trash A concave disc, when placed at an angle, will turn easily and flow material to the side. Concavity, along with Sunco's **unique** tooth design, allows the trash discs to contact material in the seed bed, then flow and release it between the rows. This tooth design also prevents the concave disc from plowing into the soil. Sunco also separates the lead and trail discs. This is very important, because when just moving trash, trash is all that turns the discs. If they are competing for the same stalk, root balls, or residue, they will stop turning and plug. The separation of the two discs allows each disc to move material and not compete with the other disc for the same material.

Sunco Row Cleaners with exclusive disc concavity, unique tooth design, and disc separation, allow planting in the toughest trash conditions without plugging!

✓ Disc concavity allows for positive rotation and trash flows out of the seedbed.

✓ Sunco's exclusive Sabre Tooth Design, teeth point down to release trash as discs rotate up.

✓ Disc separation prevents competition for trash.

✓ Heavy Duty Cast Hubs With 2 Triple Seal Bearings

Specifications

Discs - 13" with swept back teeth **Hub** - heavy duty cast, 6 bolt **Bearings** - 2 high quality triple seal
Adjustment - pin type in 1/4" increments **Weights:** Discs & Stem Assembly - 25 lbs. / Mount Brackets - 4 to 8 lbs.
